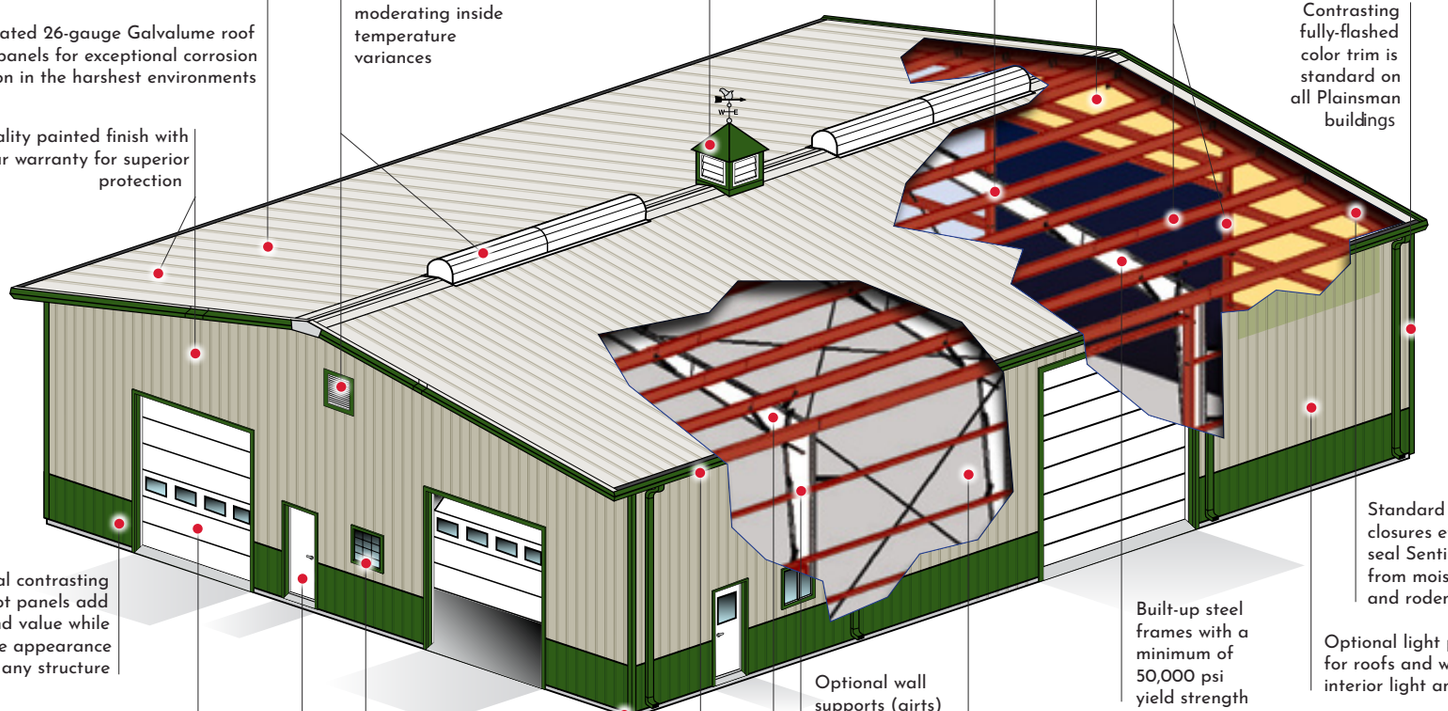
Quality. Versatility. Value.



Every Sentinel building is engineered to your exact specifications

Sentinel buildings are designed for fast and easy installation, substantially lowering total project cost

Acrylic coated 26-gauge Galvalume roof panels for exceptional corrosion protection in the harshest environments

Highest quality painted finish with 30-year warranty for superior protection

Optional roof vents and louvers improve interior air flow while moderating inside temperature variances

Optional cupolas made from 24 gauge pre-painted steel in choice of three popular sizes

Reinforced structural framing available to support installation of additional equipment such as overhead cranes

Optional roof and wall insulation packages and/or thermal energy systems with insulating values to R-38 in the roof and R-25 in the walls

Beefy 8" – 12" roof and wall supports provide superior strength and stability

Contrasting fully-flashed color trim is standard on all Plainsman buildings

Standard 1-1/4" foam closures effectively seal Sentinel buildings from moisture, dirt and rodents

Optional light panels for roofs and walls add interior light and warmth

Built-up steel frames with a minimum of 50,000 psi yield strength

Optional contrasting wainscot panels add distinction and value while enhancing the appearance of any structure

All Sentinel framed openings are fully flashed for added protection while providing a clean, finished appearance

Wide choice of high-grade insulated pre-hung or ready-to-assemble access doors

Fully insulated fixed and sliding windows in choice of sizes, shapes and finishes

Optional deluxe trim package provides a virtually "chew proof" barrier against insects and small animals

Optional overhangs, gutters and downspouts offer attractive, durable functionality in a multitude of colors

Optional wall supports (girts) at 3' 8" from the finished floor for increased stability and for wainscot installation

Built-Up or Wide-Flange structural beams in building widths up to 200 feet

Optional interior lining packages offer a more finished appearance and insulation protection, while optional partition walls provide interior design flexibility
